Video Insite Provides Custom Audio and Video Services

About Video Insite Our business is a family-owned service company that specializes in audio and video projects for individuals, small groups, churches and families. We utilize a computer non-linear editing system for the necessary editing. Personalized service to our customer is our highest priority.

Mail Order Services There was a time when many of us used 8mm and super 8mm film to record the special events of our lives. Today, however, the equipment needed to view this material is not easily obtained, leaving a large quantity of this important recorded material inaccessible. Think of that favorite movie as showing happy times with family and friends. I will transfer your film-recorded memories onto VHS tape, although there are limitations to what will be transferred. Anything that holds copyright protection or pornographic content will not be transferred. The better the 8 mm film, the better it transfers to video tape.

Testimonial From the Church Guide Publisher "I have used the Video Insite staff for a number of years to record and duplicate a two-day Successful Living Seminar. They were ready on time for each session, their equipment accomplished the capture and duplicating flawlessly, the audio sets were completed before the seminars ended, and their work was accomplished in a professional manner. I heartily recommend their company for your audio or video requirements."

OUR SERVICES INCLUDE:

- Audio & Video Editing
- 35mm Slide to VHS Duplication
- Audio & Video Duplication
- 8mm Movies to VHS Duplication

For Quality Personal Service Call Ron Franklin

He provides personal attention, high quality service, is flexible,
has a reasonable fee schedule, and has over 20 years of professional experience.
